Add "A" longest dimension and "B" longest dimension and look at the table for the total cost. Do not measure handles in this calculation. Add \$.40 for small handles and \$.80 for large handles.

Example: A = 3" and B = 5". Total = 8" Therefore, the cost for students (bisque & glaze firing) is \$4.90.

Every additional inch over the maximum size listed (28.5") is \$2.00

Please note: Due to the recession, we have tried our best to lower the fees.
